Subject: Re: Updated SCDM Values for Sulfolane

Fair enough

Hopefully you can understand that everyone associated with this site is anxiously awaiting the decision as to whether or not the Flint Hills Refinery is going to be considered as a potential candidate for the NPL ...
the sooner we can reach some finality on this, the better

Thanks for your help with this ...
Steve

If and when a NPL package is developed and the site is prospected to the NPL, then the score is final.

Subject: Updated SCDM Values for Sulfolane

Brandon,

Looking forward to getting the preliminary score

When does the "preliminary score" become the "final score" ?

Thanks,

Steve

Steve

We are unable to share the HRS score outside of EPA. Only if the site is proposed to the NPL, the score can be released. Or if the score is below 28.5 then it is releasable as well.

We can give indication if the site scores above the 28.5 threshold, but the actual number is kept confidential.

I'm hoping to have a preliminary score by the end of May or early June.

Brandon,
Fair enough
Any idea as to when we might see the HRS number ?
Thanks, Steve

Steve,

I've tasked E&E to finish the PA report and HRS score. May 1st is an unlikely deadline.

Brandon,

Thanks for sending these numbers out

Where do we go now with scoring the site ?

Any idea as to when we will see the HRS number ?

The next Technical Project Team meeting is May 1st, so it would be great if we could have something by then

Thanks again,

Steve

Subject: Updated SCDM Values for Sulfolane

Ann, Steve

The updated SCDM values for sulfolane were posted on the SCDM website today. I've attached a copy of the values.

The drinking water benchmark for the groundwater pathway was calculated to be 16 ug/L.

(See attached file: SCDM Values - tetrahydrothiophene-1-1-dioxide_a.pdf)
